DETAILED ACTION

Election/Restrictions

1. Newly submitted claim 42 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: claim 42 redefines the claimed invention by involving a sheet feeding operation.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 42 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 28, 36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 28 recites "...a gripping device...". Is this gripping device the same as or additional to the gripping device recited in claim 1?

Claim 36 recites the limitation "said plane". There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 3651

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 6, 22, 23, 28, 36, 37, 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Focke USP 6,546,698 in view of Focke USP 5,336,040.

Focke '698 discloses a similar method comprising:

- Forming, at a loading station and by means of at least one gripping device, a group of blanks defined by at least two stacks superimposed and aligned in a container (fig. 2-5)
- Feeding the container along a second path (fig. 1) to an unloading station at a store (the contents of the packaged box/carton will eventually be emptied at some location/store)
- Determining the position of the blanks in each stack with respect to a reference system by a transfer member of the gripping device (fig. 2-5 show a gripping device 36 appropriately locating the stacks in a superimposed orientation relative to previously arranged stacks)

Focke '698 does not disclose transferring said group of blanks all together from the container to the store.

Focke '040 teaches receiving a packaged box/carton and transferring said group of blanks therein all together from the container to the store (the boxes are emptied via extraction units (59)) for the purpose of providing for a means to remove the contents/blanks from a box/carton.

Art Unit: 3651

It would have been obvious to one having ordinary skill in the art at the time of the invention to have employed the use of the method involving transferring a group of blanks all together from the container, as taught by Focke '040, in the device of Focke '698 for the purpose of providing for a means to remove the contents/blanks from a box/carton.

Allowable Subject Matter

6. Claims 2-5, 7-21, 24-27, 29-35, 39-41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 3651

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
